			<p>b. Expected useful life of the equipment under normal use is limited by the wear and degradation and does not depend on the number of reuses. The subject device can be used and reused as long as no visible signs of materials degradation or loss in functionality appear. There is no potential risk identified that would arise from increased number of cycles as long as the IFU is followed. Therefore, extrapolation of the provided test to the entire product lifecycle is justified. /</p> <p>c. Guarantee the availability of all spare parts, accessories and consumables at least for the next five (5) years from testing, commissioning, acceptance and delivery. In case of product discontinuation or phase out, the exchange into an appropriate successor spare part is still warranted for a period of 5 years from the respective date of phaseout. /</p> <p>d.
