1 ✓	lot ✓		Supply, Delivery and Testing of Two (2) High-End Radiographic Portable Machine with three (3) detectors and one (1) heavy duty image printer ✓ I. Technical Specifications A. Main Equipment Brand/Model: CARESTREAM HEALTH DRX REVOLUTION 1 DRX Revolution is a state-of-the-art machine with powerful new features and benefits. At the same time, it is a rotating anode type machine. Equipped with the most advanced AI software created by Carestream Health ✓ 2 It has a free motion power-assisted collapsible and telescoping column, with side by side handles on the arm ✓ 3 Carestream's decades of innovation in the radiology field have now yielded the new benchmark in imaging software – ImageView, powered by our remarkable, AI-based Eclipse engine. Eclipse applies powerful, proprietary algorithms and artificial intelligence. ✓ 4 Image Storage Capacity: Up to 15,000 images can be saved for retransmission or reprocessing. ✓ 5 The Revolution experience begins with a single card swipe or via manual username and password entry. ✓ a. Single Swipe Card or RFID with unlimited swipe access ✓ b. Manual username and password entry ✓ 6 Length: 1260 mm or 126.0 cm (46.9 in.) ✓ 7 Width: 583 mm or 58.3 cm (23 in.) ✓ 8 Height: Floor to Top of Tube Head Column Docked - 1390 mm or 139.0 cm (54.72 in.) ✓ 9 Weight: 558 kg (1232 lb) ✓ 10 Automatic, collapsible column and low-profile design give techs a clear view of where they're going; Column rotation range: ± 270 degrees (relative to dock position) ✓ 11 Maximum incline: Ability to drive up or down incline of ≤ 7 degrees (when tube is in docked position) ✓ 12 Automatic brake: Yes; The DRX-Revolution has remarkable maneuverability – you can even make a 360-degree turn effortlessly. ✓ 13 Improved Battery Gauge uses an updated color scheme to display battery-charge levels, reducing the possibility of a dead battery. ✓ 14 Storage for all three detectors sizes and in-bin charging for detectors and detector batteries– so they're always ready for use. ✓	Php39,965,000.00 ✓	Php39,965,000.00 ✓

1		lot	Supply, Delivery and Testing of Two (2) High-End Radiographic Portable Machine with three (3) detectors and one (1) heavy duty image printer 15 With on-board storage that keeps paperwork, gloves, sanitizer, markers and the lockable detector (for holding of detector) stored at the technologists's fingertips. ✓ 16 Typical charge time: 0% to 100% battery charge in ≤ 5.5 hours (start from no LED indicators on battery level indicator, w/ new batteries) ✓ 17 With on-board storage that keeps paperwork, gloves, sanitizer, markers and the lockable detector (for holding of detector) stored at the technologists's fingertips. ✓ 18 Cord reel is positioned higher on cart for improved serviceability and ergonomic usability for technologists. ✓ 19 With improved connectivity to HIS/RIS/PACS system which promotes efficiency, accuracy, and time savings. ✓ 20 Can be operated at 110 - 240 VAC (no separate conversion), 50/60 Hz, w/ 3-pin plug ✓ 21 Equipped with Yuasa Lead-acid batteries as back-up system. ✓ 22 Does not require separate volt conversion. ✓ 23 Power consumption: System Load: 0.424A ✓ Generator Load: 0.184A ✓ L Motor and Col Load: 0.015A ✓ 24 Mechanical parts are heavy-duty durable type. This can be proven through previous installations in Manila from >8 years ago that are still working. ✓ 25 Equipment is maintainable and serviceable. ✓ B. LCD Monitor LCD/Primary Monitor serves as the control console of the main equipment. ✓ 1 Display resolution: Primary - 1280 x 1024, 60 or 75Hz ✓ 2 Primary Monitor: Easy-to-use, interface, with 19-inch intuitive touch screen control, is customized to match clinical workflow ✓ 3 With Secondary Monitor on the Tube ✓ a. A second, 8-inch touchscreen monitor at the tube head maximizes ease of use. ✓ b. Display resolution: Secondary - 800 x 600, 60 or 75Hz ✓ c. Same functions as the main/primary monitor. ✓	Php39,965,000.00	Php39,965,000.00

	1	lot	Supply, Delivery and Testing of Two (2) High-End Radiographic Portable Machine with three (3) detectors and one (1) heavy duty image printer 1.2. Markers, image, manipulation/processing tools, formatting and workflow controls ✓ 1.3. Image viewer and positioning aids ✓ 2 Based on a powerful form of artificial intelligence called Random Forests ✓ 3 Bone Suppression - this feature creates a companion image that suppresses the appearance of bone and enhances the visualization of soft tissue, to increase clinical confidence in pathology assessments. Another benefit – this option requires no additional exposure to the patient ✓ 4 Smart Noise Cancellation - Our exclusive, AI-based Smart Noise Cancellation uses deep-learning technology to isolate noise from the signal, then subtracts the noise – producing images that are dramatically clearer than what our standard noise suppression provides. SNC enables you to lower radiation dose without loss in image quality and provides improved diagnostic quality, preservation of fine detail and better contrast-to-noise ratio for images acquired at clinically nominal exposures ✓ 5 Pediatric Image Optimization and Enhancement - This option provides default acquisition techniques and image- processing parameters optimized for each patient's body size, from the smallest neonatal patient to the largest adolescent, to adult size. The seven-band multifrequency processing delivers improved noise suppression and enhances details for more productive pediatric exams ✓ 6 EVP Plus - Supercharge processing productivity with Enhanced Visualization Processing (EVP) Plus. EVP Plus image processing supports multiband-frequency processing to provide better noise control, sharpness, contrast and density while minimizing artifacts ✓ 7 Smart Collimation - This feature automatically adjusts the collimation field based on the detector size and position of each patient. This feature provides image consistency and helps reduce anatomy clipping and retakes ✓ 8 Smart Technique - The appropriate acquisition technique is automatically selected, based upon the patient's size. Enables automatic technique settings to improve workflow and reduce retakes ✓	Php39,965,000.00	Php39,965,000.00

	1	lot	Supply, Delivery and Testing of Two (2) High-End Radiographic Portable Machine with three (3) detectors and one (1) heavy duty image printer 9 "Tube and Line Visualization - Be sure with a single exposure. With this feature, a companion image is created with optimized processing for clearer, easier visualization of PICC lines and tubes. It increases confidence that tubes and lines are placed correctly – and remain in position. Pneumothorax Visualization - Save time with software that creates a companion image from the original exposure, optimized to accentuate the appearance of free air in the chest cavity." 10 SmartGrid - SmartGrid processing provides image quality comparable to images acquired with an antiscatter grid at a reduced patient dose. The benefits of grid-like image quality without the use of an antiscatter grid can lead to improved workflow and ease of imaging for radiographers 11 Administrative Analysis and Reporting - This digital dashboard allows you to analyze and develop improvement plans for your staff and the department. You can track your average exposure rates, rejected images and reasons, detector statistics, including drops, and Total Quality Tool (TQT) QA results. 12 Exposure index used during acquisition is noticeable 13 "Imaging Station: Intel Core I5 10500T 2.3 – 3.8 GHz, OS: Windows 10 (hardware and software upgrade during the warranty without additional charge to PCMC). Certification will be provided semi-annually regarding updates and/or no updates" 14 Imaging Station - Memory: 16GB 15 Image storage capacity: Up to 15000* images can be saved for retransmission or reprocessing. Images can be protected; otherwise they are reclaimed on a FIFO (first in, first out) basis. Images can be saved to removable media; CD or USB drive. *based on 500GB Solid State Drive 16 DICOM 3.0 compliant 17 With DICOM Store and DICOM Print 18 With cyber security user management G. Operating and System Battery 1 With grounded safety power socket and battery- powered 2 Improved Battery Gauge uses an updated color scheme to display battery-charge levels, reducing the possibility of a dead battery 3 Typical usage capacity: The battery life allows for driving 2.4 km (1.5 mi.) and 120 exposures without charging. This assumes fully charged batteries and exposure technique factors of 70kV @ 10 mAs	Php39,965,000.00	Php39,965,000.00
